DIN EN ISO 9001:2015

Caution!

When the control unit is switched on, the motor cable must NOT be disconnected. This can lead to damage to the motor driver. In this case we do not provide any warranty!

The instructions refer to the e-dispenser Art. 4096 and 4099 as an example.

1 Touchscreen Overview Main menu

Touchscreen-Controller e-dispenser 200/400 MA

DIN EN ISO 9001:2015

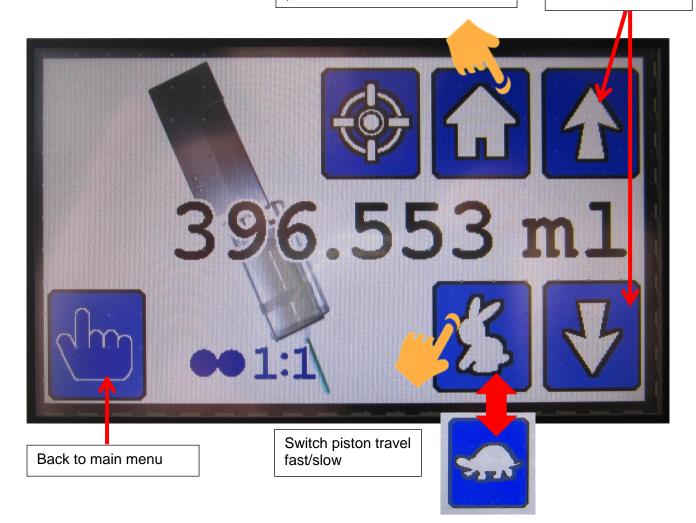

Attention: Before a dosing program can be started, the dosing valve must be referenced and then the pistons must be manually inserted into the cartridge.
Until then, "Start " remains grayed out and cannot be called up.

2 Referencing

Home button/referencing.
The pistons move to the home position

Pistons move up or down as long as the button is touched

Erstellung:	DokStand:	Dokumentverzeichnis:	Seite:

		dispenser 200-400 MA Version2.docx	

Touchscreen-Controller e-dispenser 200/400 MA

DIN EN ISO 9001:2015

Perform the referencing using the "Home" button.

The pistons retract. This can be used to replace an empty cartridge, for example.

3 Taget

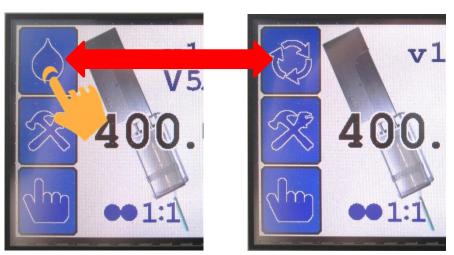

As soon as the valve pistons have reached the displayed fill level of 418 ml or below (e-dispenser 400 MP), the value can be set to "400 ml" using this button.

The contents are then counted down from this value.

This serves to better recognize the remaining dispensing material in the cartridge.

4 Switching to volume dosing / Continuous dosing

Switch from volume to continuous dosing and back.

Dosing takes place with the set dosing parameters as long as the dosing parameters as long as the signal is given (e.g. by pressing START continuously or by pressing a foot switch).

7 Admin Settings

Dosing parameters such as

- Retract volume
- Retract speed
- Speed Home-Position fast
- Speed Home-Position slow
- Speed manually fast
- Speed manually slow

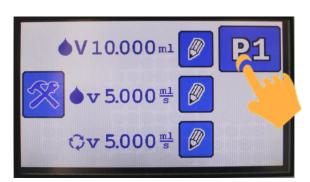

can be changed in the Admin-Submenu.

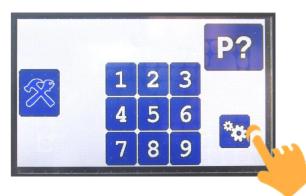

Touch "Settings"-Button

and enter password for SETTINGS

Afterwards touch the button for "Program"-selection:

Touch the button with the gear icon and you will be taken to a new password query.

Enter the ADMIN-Password (Passwort: 2002) and confirm with

8 Dosierung

- 1. if all dosing parameters have been set and the dosing valve has been referenced, the pistons can be moved into the cartridge in manual mode.
- 2. if the fill level falls below 400 ml, the value can be set to 400 ml via "Target". The "Start" button becomes available.

3. Touch the "Start" Button, to execute a dosing (Volume- oder Continuous dosing)

During dosing, the "Stop" button becomes available to end the volume dosing prematurely if necessary.

Continuous dosing is carried out as long as the "Start" button is touched and can therefore be ended at any time.

If the cartridge level falls below a defined minimum fill level (less than the set dosing volume in ml), the filling level display turns red.

A further dosing cannot be executed, the "Start"-Button is greyed out.

9 External program change

Program numbers 1 - 7 can be selected externally via pins 5-7 on the 15-pin Sub-D socket (X1).

The externally selected program takes priority over the currently selected program on the control unit itself.

If external control ends, the currently selected program of the control unit is active again!

Overview of Pins:

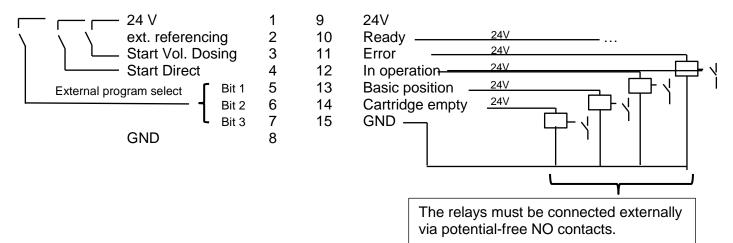

bit1 = 5

bit2 = 6

bit3 = 7

	Prog. 1	Prog. 2	Prog.3	Prog 4	Prog. 5	Prog.6	Prog.7

13 Declaration of conformity

In accordance with the EEC machine directive 2006/42/EG of 17. May 2006, appendix II A - EG-directive of electromagnetic environmental compatibility (EMV 2014/30 EU)

We hereby certify that the following described controller in its conception, construction and form is in accordance with all the relevant essential health and safety requirements of the EC machinery directive 2006/42/EEC as amended and the national laws and regulations adopting this directive.

This declaration is no longer valid if the controller is modified without our consent.
